SUMMARY

Software Engineer specializing in React.js, Python, FastAPI and Node.js with strong problem-solving skills and hands-on experience in building scalable web applications. Experienced in API integration, backend development, debugging, and deploying production-ready systems. Contributed to US-based clinical support projects during internship at Raysoft.ai. Passionate about building real-world, high-performance applications.

EDUCATION

BLDEA's V.P. Dr. P.G Halakatti College of Engineering and Technology, Vijayapura, Karnataka - CGPA 7.8

Jan 2021- July 2025

NxtWave Disruptive Technologies - Industry Ready Certification in Full-stack Development and DSA

Aug 2023 – Oct 2025

EXPERIENCE

Raysoft.ai – Software Engineer Intern

Sep 2025– April 2026

- Designed and developed REST APIs using FastAPI for Indian and **US-based** healthcare applications.
- Integrated Redis caching in FastAPI endpoints, improving response time by 30–40% for healthcare APIs.
- Automated background tasks using cron jobs for scheduling and reminder systems.
- Reduced database load by optimizing PostgreSQL queries and indexing strategies.
- Managed **Git** version control using structured branching strategy, reducing deployment conflicts by **50%**.

PROJECTS

Jobby Application – jobbyappijp.ccbp.tech/login – Cred's- rahul and rahul@2021

- Built a React.js job search platform with JWT authentication, protected routes, and API-driven job listings.
- Implemented filters for employment type and salary range, improving search relevance and user experience.
- Designed responsive UI components with React Router and REST APIs for seamless **cross-device** usability.

Smart Parking System – ijps-smart-parking-system-iota.vercel.app

- Developed an IoT-based smart parking system with FastAPI backend and Next.js dashboard for real time slot visibility.
- Processed sensor data and booking events through REST APIs to display live parking availability and reservations.
- Built a real-time visualization layer for parking insights, improving operational monitoring.

Digit Detection Using Machine Learning - <https://github.com/Prashantijamgondi/Digit-Recognition>

- Built a digit recognition model using Python and TensorFlow, with Pandas and Matplotlib for preprocessing and analysis.
- Developed a real-time inference workflow for handwritten digit classification.
- Evaluated model performance and achieved high classification accuracy.

SKILLS

- Languages:** Python, JavaScript, C++, HTML/CSS.
- Backend:** Node.js, FastAPI, REST APIs.
- Frontend:** React.js, Next.js.
- Databases:** PostgreSQL, SQLite, Redis.
- Tools:** Git, GitHub, VS Code, Docker.
